

NYLOG BLUE

GASKET & THREAD SEALANT

Compatible with all Refrigerants

Will not contaminate system

30ml

BENEFITS

Nylog is a unique gasket and thread sealant that will not contaminate A/C or Refrigeration systems. The fluid never hardens or dries and will always remain in an elastic state. It fills cracks and voids to prevent all leaks, especially during temperature spikes and system vibration. Nylog is used in OEM assembly and field service. Please see directions and visit our website for more information.

DIRECTIONS

Apply Tighten All done "sealed"!

Threads – Wind fluid around threads like liquid string

Gaskets – Apply to both sides

Nylog Blue
